Abstract

This is a social communication site for a university where students and teachers will be able to use this system to perform their related operations like checking students profile containing all the information of them and users can post any status publicly and others can discuss about them. Here, users can send personal messages to other users. The system is designed to be secure by providing a login feature which authenticates the user by means of a email and password with which user will be able to login to his/her respective system and use the system as required. The application provides a system which is immune to error.
